Dear parents/guardians,

RE: MEASLES, CHICKEN POX AND SHINGLES

We require your co-operation in an important matter.

One of our students is receiving medical treatment for cancer which puts them at risk if they are exposed to measles, chicken pox or shingles.

The best way to protect them from measles is for everyone at school to be immunised. Please would you discuss measles immunisation with your GP if your child has not received it. If your child is suspected of having measles, you must let us know immediately.

Our student is also at risk from chicken pox and would need to be given medication within a few days of contact. If your child is suspected of having chicken pox you must let us know immediately.

Finally, it is also important that you let us know if there is shingles in your household.

The health and wellbeing of a member of our community depends on the co-operation and prompt communication of the whole Langton family, and we thank you in advance for your help and support with this matter.

With many thanks.

Yours faithfully

Mr P Pollard
Headteacher
